

ABSTRACT OF THE DISCLOSURE

- 5 A method of making a digital voice library utilized for converting text to concatenated voice in accordance with a set of playback rules includes generating a complex tone that reflects a particular inflection required for a particular voice recording of a particular speech item. The complex tone is composed of portions of a recording of a voice talent uttering a vocal sequence. The voice talent is recorded reciting the particular speech item to make the particular voice recording. The voice talent uses the complex tone as a guide to allow the voice talent to recite the particular speech item in accordance with the particular inflection.
